

## PMMA Retardant Masterbatch MB-AC20A

Inovia MB-AC20A is a master-batch of Inovia AR-S11 with a 20% active component. It can reach UL 94 V0. At the same time, the high transparency of acrylics is not affected. The final product shows greater flowability and processability.

### Physical Data

Item	Data
Retardant Loading	20wt.%
Appearance	Transparent pellet

### Recommended Usage

MB-AC20A Loading Level	UL 94 Rating
15~20%	V2@0.4~1.6mm
35~45%	V0@0.4~1.6mm

### Processing

The processing temperature during modification can be about lower 20°C than the base material.

### Packaging

25kg/bag. Samples can be packed as required.

\*The data recommended in this document can be used as a reference for various purposes. There will also be some amendments along with new technical improvements. Therefore, when designing the product, the use environment and structure of the product should be fully considered, and whether the product has any problems should be judged by the design company itself.
